OBJECTIVE

STUDENT

A motivated and detail-oriented B.Tech Computer Science student passionate about creating impactful software and web-based solutions. Seeking to contribute my skills in full stack development and problem-solving through innovative projects and internships.

EDUCATION

MIT Academy of Engineering, Pune

B.Tech in Computer Science (2024 – 2028)

Affiliated to Savitribai Phule Pune University

Abhinav Academy Junior College, Gadhinglaj

HSC - Science Stream (2022- 2024)

Under Shivaji University, Kolhapur

Creative High School, Gadhinglaj

SSC - Maharashtra State Board (2021-2022)

SKILLS

- Technical Skills
- Programming Languages: C, Python, Java (Basic)
- Web Development: HTML, CSS
- Tools & Platforms: Canva, GitHub, VS Code
- Soft Skills
- Communication & Public Speaking
- Teamwork & Collaboration
- Leadership & Team Management
- Presentation & Time Management

PROJECTS

Smart Energy Conservation System for Household Lighting using IoT (May 2025)

Built a smart IoT-based lighting system to reduce household energy usage through automation and sensor-based controls.

Pre-ordering System and Seat Booking for College Canteen (May 2025)

Developed a web-based solution enabling students to book meals and seats in advance, improving efficiency and reducing wait times.

CERTIFICATIONS

Python Essentials 1 & 2 - Cisco Networking Academy (Apr 2025)

• Completed through MIT Academy of Engineering, covering Python fundamentals, conditionals, loops, data structures, and functions.

Canva for Work - Canva Design School (June 2025)

 Certified in brand consistency, visual communication, presentation design, and data storytelling.

Introduction to Kali Linux Basics - Simplilearn (Dec 2024)

• Gained foundational knowledge in Kali Linux tools and cybersecurity interface.

Beginner Linux Complete - MindLuster (Dec 2024)

• Understood core Linux concepts, commands, shell basics, and beginner system usag

INTERNSHIPS

Intern - Java, SQL & Soft Skills

Anudip Foundation • May 2025 - Present

- Learned fundamentals of Java and SQL through hands-on modules.
- Practiced professional communication, time management, and career readiness.

Intern - IBM SkillsBuild Program

Edunet Foundation • Mar 2025 - May 2025

- Completed real-world project simulations using Python and cloud tools.
- Gained experience in industry tools and agile methodologies.

CAREER INTERESTS

I am passionate about building real-world software solutions and aspire to become a skilled full stack web developer. I enjoy working on both front-end and back-end technologies, with a strong interest in automation, smart systems, and scalable design. I aim to grow in a collaborative environment while solving meaningful problems through code.
